SORRY ABOUT THAT

CPYRGHT

CPYRGHT

In answer to Mr. Al McDon-
ald; I am glad you have
brought one of Tech's most em-
barrassing problems out in the
open. We here at the School of
Mines are grievously aware of
the injustice we are doing to
the good name of Rapid City
by having no pot parties, no
LSD trips and not even a mem-
ber of SNCC on campus.

However, we are seriously at-
tacking the problem from all
angles and have even consid-
ered importing some experts
from Berkeley to help us clean
up this sticky problem. We have
contacted the CIA and with their
support we may eventually get
a few banana smokers or with
any luck at all a blood drive to
help the Viet Cong.

So you see, Mr. McDonald,
as deplorable as the situation is,
we are at least trying to do
something — in between tests,
that is!
